**Olivia Daley (June 21, 2016)**

Sharing with everyone my loss of my Scottish terrier Agnes. She first got sick on Tuesday 14 June (2016) not eating, vomiting. By Wednesday she had diarrhea as well and was much worse couldn't stand still wouldn't eat or drink, we had taken her to vet on Tuesday and had bloods done and she received pain relief.

Early Friday morning she passed away, she was only 4 years old. Bloods and autopsy came back acute pancreatitis and kidney failure. she had absolutely no symptoms of this before and was healthy and very active, the only thing I had done differently was give her a

bravecto tablet 1 month prior. I have 10 scotties and I had only given 2 of the dog's bravecto, after this shocking cruel death I will never be using this again and am looking to support the other dog I gave it too. Agnes leaves behind her twin brother Hector such a unnecessary thing to happen. My heart goes out to all the other people and pets who are going through the same hard times.
